

VINAMRATHA SHETTIGAR

Backend Engineer | PHP & Laravel Developer

vinamrathashettigar1@gmail.com | 437-248-6249 | [LinkedIn](#) | [Portfolio](#) | Canada

Backend Engineer with 10+ years of experience building and supporting PHP-based enterprise applications across payments, financial services, and IT services domains. Strong expertise in backend development, REST APIs, SQL databases, production support, and scalable application design. Experienced in developing secure APIs, resolving critical production issues, and collaborating with cross-functional teams in Agile environments. Recently built and deployed a full-stack Laravel-based digital wallet system using GitHub, Render, Railway, and Netlify, demonstrating modern cloud deployment and backend engineering practices.

Technical Skills

- Backend & Web Technologies: PHP, Laravel, REST APIs, JavaScript, AJAX, jQuery
- Databases: MySQL, MS SQL Server
- APIs & Tools: Postman, API Debugging, JSON
- Cloud & Deployment: Render, Railway, Netlify, GitHub
- CMS & Platforms: Joomla, Magento, WordPress
- Version Control: Git, GitLab
- Tools & Utilities: VS Code, Eclipse, Jira, Redmine, PuTTY
- Operating Systems: Linux, Windows, macOS
- Development Practices: Agile/Scrum, Production Support, Peer Reviews, Debugging

Projects

FinFlow Wallet System

Technologies: Laravel, PHP, MySQL, REST APIs, GitHub, Render, Railway, Netlify

GitHub: [FinFlow Repository](#)

Live Demo: [FinFlow Live App](#)

- Developed and deployed a Laravel-based digital wallet and peer-to-peer transfer system with secure transaction handling and RESTful APIs.
- Implemented user authentication, wallet balance management, transaction history, and backend business logic.
- Built REST API endpoints supporting secure transfers and transaction tracking.
- Designed scalable backend architecture and integrated cloud deployment workflows using GitHub, Render, Railway, and Netlify.
- Improved understanding of Laravel application structure, deployment pipelines, debugging, and production-style hosting practices.

Professional Experience

Software Developer III (Moneris)

Nov 2020-Nov 2024

- Developed and optimized PHP-based REST API endpoints supporting communication between 350,000+ merchant locations, merchant portals, and terminal devices.
- Implemented secure authentication and authorization mechanisms, including API token management and role-based access control.

- Designed and built customer management services enabling CRUD operations and real-time multi-currency conversion to support global payment workflows.
- Authored and maintained API documentation, improving onboarding efficiency and supporting smoother feature enhancements.
- Investigated and resolved critical production defects and performance issues, improving application reliability and operational stability.
- Collaborated closely with QA teams, business stakeholders, and developers in Agile/Scrum environments.
- Participated in peer reviews and pair programming sessions to improve code quality and knowledge sharing.

Technologies: PHP, MS SQL Server, REST APIs, Postman, GitLab, Jira, PuTTY

Web Developer (Arista Networks)

Sep 2016-Jul 2019

- Developed and maintained PHP-MySQL backend modules and custom Joomla components supporting enterprise workflow automation and content management systems.
- Built reporting dashboards with filtering, pagination, and automated background jobs using Cron.
- Integrated third-party APIs to enhance business workflows and application functionality.
- Implemented two-factor authentication (2FA), access control, and compliance-related workflow automation features.
- Designed SQL triggers and logging mechanisms for user activity tracking, auditing, and reporting purposes.
- Developed internal operational tools that improved request tracking and process efficiency.

Technologies: PHP, MySQL, JavaScript, AJAX, jQuery, HTML, CSS, Joomla, WordPress, Redmine

Web Developer (Mentorware India Pvt Ltd)

Nov 2014-Sep 2016

- Developed and maintained backend functionality for database-driven PHP web applications in Linux-based environments.
- Built and tested applications using the LAMP stack and supported backend feature enhancements.
- Improved order fulfilment workflows and implemented structured order data capture processes.
- Designed and implemented a pin code-based shipping validation system to improve delivery accuracy.
- Enhanced application usability and backend performance through optimization initiatives.
- Implemented PDF generation functionality for reporting and product documentation workflows.

Technologies: PHP, MySQL, HTML, CSS, Magento, LAMP, Redmine

Web Developer (Intern/Junior Role) (SLNTGS Software Solution)

Aug 2014-Oct 2014

- Developed login and authentication functionality using PHP, JavaScript, and MySQL.
- Assisted senior developers with debugging, testing, and feature enhancements.
- Supported implementation of dynamic database operations and backend functionality.

Education

Bachelor of Engineering (Computer Science)

The Oxford College of Engineering, Bangalore, India

Graduated: June 2013
